

Research Guide: UAE Labor Dispute Resolution & Portal Navigation (2026)

This document serves as a foundational guide for building an AI-driven legal assistance system for laborers in the UAE. It maps the legal framework, official channels, and procedural data requirements.

1. Legal Foundation

All guidance must be rooted in **Federal Decree-Law No. 33 of 2021** (on the Regulation of Labour Relations). Key articles include:

- **Article 17:** Obligations regarding timely payment of wages.
- **Articles 42-45:** Provisions on termination of employment.
- **Article 51:** Regulations concerning End of Service Gratuity.

2. Official Complaint Ecosystem

Complaints are managed digitally. The system must guide users to these exact platforms:

- **Primary Portal:** [MOHRE E-Services](#) (Labour Complaints Section)
- **Mobile:** Official MOHRE Smart App.
- **Support:** Call 600 590000 or use the verified WhatsApp channel.

3. Required Data Points for Complaint Generation

To assist users in filing, the AI must collect the following structured information:

Category	Required Data Points
Personal	Emirates ID, Passport Number, Contact Information
Employment	Company Name, Establishment Number
Contractual	Start Date, Salary (Contractual), Work Model
Dispute	Dispute Type, Exact Amount Owed, Detailed Timeline

4. Procedural Workflow

The Lifecycle:

1. **Submission:** User submits details via the MOHRE portal.
2. **Mediation:** MOHRE acts as mediator (14-day window).
3. **Resolution:** Settlement agreement or referral to Labour Court.
4. **NOC:** Mandatory for cases exceeding AED 50,000 or failed mediation.
